

HSE Officer – Renewable Energy

VRH Power is looking for a **HSE Officer** who will play a critical, site-based role in managing the **safe, compliant, and sustainable construction practices** across VRH Power's construction and renewable energy projects.

The successful candidate will be responsible for **implementing, creating risk plans, monitoring, and continuously improving Health, Safety and Compliance** in line with legislative, client, and internal en external standards.

This role requires a **hands-on HSE professional** with strong construction experience, particularly within **high-risk environments** such as electrical, HV, OHL, and working-at-heights activities, who is **confident operating on site**, engaging contractors and teams, and driving a proactive safety culture.

Regular travel and extended site stays form a core part of the position.

Mandatory Qualification & Experience

- SACPCMP Registered
- Grade 12 (Matric)
- Minimum 2 years' experience as a Safety Officer on construction projects
- Experience working with Eskom or within the renewable energy sector (advantageous)
- Sound knowledge of electrical hazards, and working at heights
