A. SUMMARY BRIEF

1. INTRODUCTION

The South African Council for the Project and Construction Management Professions (SACPCMP) is a statutory body established by Section 2 of the Project and Construction Management Act (Act No.48 of 2000) (the Act), is a juristic person established for statutory professional certification, registration and regulation of Project and Construction Management Professions and specified professions recognised according to Section 18 (c) of the Act, in order to protect public interest. In line with the Construction Industry development initiatives, the Council continues to advance and promote the science and management practice of project and construction management, amongst others, thereby contributing towards promotion of the Construction and Built Environment industries.

It further regulates the Project and Construction Management Professions and specified professions recognised according to Section 18 (c) of the Act, to protect the public, by identifying the type and scope of work, registering professionals and maintaining a national register of professionals who adhere to a Code of Conduct.

2. BACKGROUND

According to the Section 19 (2) (a) of the Project and Construction Management Profession Act, 48 of 2000, the Council measures the competence of applicants before professionally registering them. The Council does this through different competency assessments methods and instruments, namely: reports, portfolios, logbooks, interviews and examinations.

The Council currently delivers paper-based designation examinations, managed by an external service provider who delivers, invigilates, and marks examinations at various examination venues around the country. Furthermore, the Council also conducts physical professional interviews at various venues. The delivery modes of these assessments were constantly disrupted by the adjusted COVID-19 restrictions. The Council is now transitioning to a fully digital solution for examinations and professional interviews. The Council has had a breach of its examination administration in the past, which was plagued with security vulnerabilities. It is important that the Council, when it transfers its examination administration and professional interviews to an online system, ensures that it is secure and erstwhile breachers are not possible.

3. PROJECT SCOPE

The purpose of this RPF is to procure virtual proctoring services to secure the SACPCMP's examinations and professional interviews.

4. SCOPE OF WORK

The scope of work includes:

1. Securing Online Examinations

In order to secure the Council's online examinations, the Council must procure virtual proctoring software or services. The following security features must be ensured:

- Reliable verification of the identity of examination participant
- Securing of the examination environment
- Examination process security
- Lockdown browser technology (incl. shutting down disallowed browser activity)
- Live remote invigilation for the duration of the examination (optional)
- Examination participant behaviour reporting
- Incident management (incl. shutting down examination when a breach occurs)

- Examination participation behaviour reporting (e.g., attendance report, ergonomics report, incident report and user survey report)
 - Integration or compatibility of the proctoring software with the Council examination platform
2. Securing Virtual Professional Interviews
- The Council must also secure its virtual professional interviews either through a secure proctoring platform for this purpose or software that could be used to secure virtual meeting platforms like Zoom or Microsoft Teams.
- Reliable verification of the identity of interview participant
 - Securing of the interview environment
 - Lockdown browser technology (incl. shutting down disallowed browser activity)
